

GCP Overview

GCP is a standard for the design, conduct, performance, monitoring, auditing, recording, analyses, and reporting of clinical trials that provides assurance that the

- Trial subjects' rights, integrity, and confidentiality are protected.
- Data and reported results are credible and accurate.

Malaysia adopted GCP in 1999, and since then doctors are required to undergo training on GCP leading to certification prior to participation in clinical trial. This course is specifically designed to meet this requirement.

Objectives

- To understand the principles underlying GCP and its specific rules of conduct
- To provide experience in the key skills required through simulation in classroom setting
- To provide some of the resources required to design and to conduct GCP trial
- To achieve an overall understanding on how to conduct GCP compliant clinical trial

Who should participate?

- Clinical Physicians
- Any clinicians that involved with clinical trial
- Clinical Research Associate
- Clinical Trial Pharmacist
- Postgraduate Student
- Clinical Trial Statistician

Workshop Contents

- Overview of ICH/GCP and Malaysian GCP
- Overview of ethics of clinical research Ethics and regulation of clinical trials Role of IRB/IEC
